GHSA 2014-2018 Where We Go From Here?

GHSA has served its purpose of bringing nations together from all over the world to make new, concrete commitments and to elevate global health security to a priority at the national leadership level

Health Minister of Indonesia
Nila F. Moeloek

Bali considered as milestone in GHSA history, renew and more effective collaboration, and develop more effective communication

Giuseppe Ruocco
Secretary General MOH Italy

Puan Maharani, Coordinating Minister of Human Development and Culture with Nila F. Moeloek Minister of Health, Indonesia; Giuseppe Ruocco, Secretary General Ministry of Health, Italy; and GHSA member states delegates at the opening ceremony of 5th GHSA Ministerial Meeting, November 6th, 2018, Bali - Indonesia

GHSA 2014 - 2018 and Beyond

The first plenary session provides an overview of the progress achieved and challenges encountered in the first phase of GHSA. High level dignitaries from International Organizations delivered keynote addresses. The GHSA 2024 Framework serves as guideline for the next phase of GHSA presented and launched during this session.

- Mr. Giuseppe Ruocco, Secretary General, Ministry of Health, Republic of Italy, Chair of GHSA 2018 as moderator of the panel discussion. Speaker of the session are:
- Prof Dr Nila Farid Moeloek, Minister of Health, Republic of Indonesia, presented update on GHSA 2014 - 2018
 - Dr Ganglip Kim, Deputy Minister of Health and Welfare, Republic of Korea, presented the GHSA 2024 Framework.
 - Keynote address presented by the Director General of WHO, Mr. Hendrik Jan Ormel from FAO and Susan Corning from OIE.

Partnerships at Global Level

The second plenary session, shared experiences and lesson learn carried out by international organizations in the context of public health preparedness. The session addressed the current practice of collaboration among GHSA member states and how to improve collaboration and create better alignment to support the next phase of GHSA.

Hosted by Valerina Daniel from Berita Satu Indonesia, with speakers from UN Agencies:

- Dr Jaouad Mahjour, Director of Country Health Preparedness & I HR, World Health Organisation, presented Progress on country capacity assessment, monitoring and planning.
- Hendrik Jan Ormel, FAO, presented One Health approach for country assessment and capacity building.
- Susan Corning, Senior Advisor to Deputy Director General, OIE presented the continuing evolution of the OIE PVS Pathway.
- Dr Mukesh Chawla, Chief Adviser, Global Health Security, the World Bank, presented Health Security Financing Policy Dialogue and Action.

IHR 2005 : Collective Action for Effective Preparedness

The forum built upon current momentum to identify actions and support countries to strengthen their capacities as required by IHR 2005 in collective and coordinated manner. This forum focused on prioritization - implementation - monitoring and accountability in national action plans for health security (NPHS).

The world remains vulnerable and requires countries and health security stakeholders across sectors to continue working together, in accelerating IHR implementation and ensuring long-term sustainability of country capacities.

Global Health Young Leaders

INDOHUN presented series of training programs for Young Leaders from GHSA countries, such as Global Health Diplomacy (GHD) training and One Health Smart, a platform designed for young professionals and students to learn how to collaborate and coordinate in solving complex problems.

By investing resources in the younger generation, INDOHUN believes that in the future they will be leader to solve complex problems in more effectively and efficiently involving cross-sector collaboration and coordination. In this event INDOHUN also presented their perspective on Infectious Disease Management training using the One Health SMART™ (OH-SMART™).

Next Generation Global Health Security Network

The AMR Challenge, Building Momentum for Local Action

US Government encourages better understanding on Anti-microbial Resistance (AMR) challenge as yearlong effort to accelerate the fight against anti-microbial resistance across the globe. The challenge asks public and private stakeholders around the world to make and fulfill commitments to counter AMR.

An example from the struggle to initiate Tuberculosis Multi Drug Resistant. The usual TB treatment regimen is long and complicated, many people do not finish their full course, and raising the chances to drug resistance.

University Role in Advancing One Health Workforce Development

SEAOHUN promotes the role of universities and partnerships with ministries in building the capacity of current and future multi-sectoral workforces to better respond to new, emerging, and re-emerging disease threats. Universities play a key role in developing and sustaining multi-isectoral capacity in workforces through the creation of a pipeline of current and future professionals trained in the One Health approach.

Financing Preparedness at the Country Level

The World Bank, together with government and development partners hosted a discussion to bring key stakeholders to chart a clear and actionable path for financing preparedness by identifying pragmatic and incentive-compatible ways in which low income countries can mobilize domestic resources and develop financing to strengthen the capacities to prevent, detect and respond to major disease outbreaks.

Recent upsurge in the use of Joint External Evaluations (JEEs) to quantify current gaps in country capacities reflects the importance that countries have begun to give to pandemic preparedness, but this has not been accompanied by supporting increases in domestic or development partner spending on strengthening public health capacities. As a result, many countries are under-prepared for the next devastating epidemic.

Expanding Alliance in Global Health Security

Private sectors roundtable discussion talk about how the Private Sector Roundtable (PSRT) and other non-governmental partners view public-private partnerships in global health security and explore opportunities for collective engagement under the framework of GHSA 2024.

In partnership with governments, private sectors could advance the progress toward health security by leveraging collective expertise and resources in a range of areas.

Zoonotic Diseases Action Package

Zoonotic Disease Action Package (ZDAP) session discussed the progress made, lessons learn and identify activities needed to strengthen and fully implement the ZDAP Action Plan 2014 - 2019. In addition, they discussed ZDAP membership and it's support for GHSA Framework 2019-2024.

ZDAP as one of the Action Package, purposing to strengthen capacities of GHSA participating countries, in detecting, preventing and responding to global public health threats, mainly zoonotic diseases that could cause an outbreak, pandemic of public health emergency of international concern (PHEIC).
